

JOB DESCRIPTION

JOB TITLE: Integration Architect
REPORTS TO: Operations Manager, Southern Region
LOCATION: Wellington

Job Scope

The role spans three key areas in which you will prove your technical, consulting and leadership skills as follows:

- To provide technical consulting, and to design, develop and support high quality software solutions for Solnet's clients.
- To provide technical input to Solnet's existing and future direction to maximise market opportunities.
- To nurture the supportive and innovative culture within Solnet by providing creative ideas, leadership and mentoring.

Role and Responsibilities

- Lead technical consulting engagements with clients, and quickly build credibility to become a trusted advisor and partner
- Understand, develop and articulate client's preferences and needs, and specify and document technical solutions to meet their requirements
- Identify growth opportunities with new and existing accounts
- Provide architectural and expert input on proposals, including scoping, design, estimation, and feasibility
- Design, build and integrate end-to-end solutions for clients
- Provide technical project delivery leadership and expertise, and assist technical teams with the design, build and integration of a solution
- Keep up to date with the latest technologies, best practices and trends relevant to integration
- Actively contribute to our website blog and social media and represent Solnet at relevant industry events
- Provide thought leadership in the selection and application of architectural integration patterns, technologies, tools, frameworks and approaches. Work to ensure alignment of these across the company
- Provide mentoring, training and guidance to other team members
- Assist with resolution of incidents and problems for Solnet-supported applications
- Be available for on call or work outside of usual hours, from time to time.

Key Performance Indicators

- Contribution to the creation of market leading enterprise solutions
- Contribution to securing opportunities with new and existing accounts
- Recognised competency and leadership with respect to solution design and delivery
- Successful delivery of solutions that meet client needs
- Consistently meet the quality standards and delivery timeframes for assigned deliverables
- Contribution to supportive and innovative team culture

- Excellent feedback from clients and colleagues.

Qualifications

- Ideally (but not limited to) a Computer Science Degree or equivalent.

Skills and Experience

- Broad and diverse experience in the design, development and integration of end-to-end solutions over a period of at least seven years
- Proven consulting experience relevant to solution architecture including:
 - working with business and technical stakeholders and end-users to deliver successful outcomes
 - helping to develop and grow client accounts
- Strong understanding of the key elements of transformational integration architectures, solutions, patterns and processes
- Extensive technical delivery and consulting experience in the Integration domain. This includes areas such as: APIs/API management, microservices, web services, ESBs, and cloud integration (Azure and AWS)
- Experience and knowledge of agile development principles, practices and related tools/technologies, eg SCRUM, Kanban, continuous delivery, continuous integration, test automation
- Active involvement in integration communities both internally and externally
- Experience working with government agencies.

Other Attributes

- Client outcome driven
- Strong technical and people skills
- Demonstrated ability to master new techniques and technologies rapidly
- Capability to plan and manage multiple tasks to reach a successful conclusion
- Aptitude to work effectively under pressure and to adapt to change
- Competence to work well in a team and effectively contribute to the team's success
- High level of written and verbal communication skills
- Excellent presentation skills
- Excellent problem-solving abilities
- Self-motivated and self-managing, uses initiative to get things done
- Reliable and dependable
- Ability to lead a team of business and technology experts
- Able to travel and conduct business outside of Wellington, from time to time.
